

# COBie

# Briefing 4: COBie UK 2012

## Why do we need COBie ?

Nicholas Nisbet

AEC3 UK Ltd  
buildingSMART UKI  
Advisor to UK Government BIM Task Group

11<sup>th</sup> July 2013

## Sharing:

- **Strategic:**
- **Interoperability**
- One format, many paths

## Structured

- **Management:**
- **Checkability**
- One input, many checks

## Information

- **Authoring:**
- **Re-usability**
- One input, many outputs

# Strategy

Why do we need COBie ?

**“Government as a client can derive significant improvements in cost, value and carbon performance through the use of open sharable asset information”**

# UK Government BIM Strategy Criteria

**Valuable**: the overall aim is to maximise client value

**Understandable**: the approach is to be presented in an understandable learning package for all 44,000 government asset procurers.

**General**: the approach is equally applicable to buildings and infrastructure, whether large and small.

**Non Proprietary**: All requirements are non-proprietary as to applications and as to the required formats of the deliverables.

**Competitive**: Wherever possible there are at least two solutions or methods available so as to minimise market influence in terms of anti competitive clauses.

**Open**: Wherever possible, low-cost methods are to be made available to allow all stakeholders to participate, irrespective of size and experience, so as to minimise barriers to involvement.

**Verifiable**: all contractual expectations are documented with transparent and testable measurement of pass / fail.

**Compliant**: Measurement of WLC/Carbon/Sustainability/etc are to published GB, EU and ISO standards

**Implementation**: self funding by the industry

**Timescale**: the approach is phased in over 5 years

# Why does the owner want data, anyway?

|     | Purpose                          | Detail  | BSI Pas 55 references           |
|-----|----------------------------------|---|---------------------------------|
| P01 | <b>Registration</b>              | Registration of assets to support accurate audit and reporting. This includes GIS, land and address identification for the facility. It includes spaces and zoning, including stacking or sectoring, and components and systems and typing.                         | 4.5.1a, 4.4.6, 4.6.6, 4.5.1.3   |
| P02 | <b>Use and utilisation</b>       | Documentation of the intended use, capacity and utilisation of the Facility to support comparisons of actual use and utilisation and portfolio management. It also supports improved briefing for future projects. Includes data for any soft-landings usage review | 4.5.1b, 4.5.1 i, 4.5.1.4        |
| P03 | <b>Operations</b>                | Information necessary for the normal operations of the building to support the facility operators and the owner to anticipate costs of operations.  | 4.5.1 i, 4.5.1.2, 4.6.1         |
| P04 | <b>Maintenance and repair</b>    | Information on the recommended maintenance tasks including planned preventative maintenance to support the facility operators the owner to anticipate costs of maintenance.   | 4.5.1c, 4.5.1.2, 4.5.1.5, 4.5.2 |
| P05 | <b>Replacement</b>               | Information on the reference or expected replacement service life and costs should be available to the facility operators and to the owner to anticipate costs of maintenance.  | 4.5.1.7                         |
| P06 | <b>Assessment and re-use</b>     | Information on factors to support the management of the end of use stage, whether resale, tenancy release or demolition.  | 4.5.1d, 4.5.1.6                 |
| P07 | <b>Impacts</b>                   | Economic and environmental (but not social) impacts   | 4.5.1 iii                       |
| P08 | <b>Business case</b>             | Information to support the on-going evaluation of the business case for ownership of the facility, as required during the design development gates. Continuously review is the primary driver for the intermediate 'Drops'.   | 4.5.1                           |
| P09 | <b>Security and surveillance</b> | Information to support the management of the security and surveillance of the facility, excluding sensitive parameters.   | 4.4.7                           |
| P10 | <b>Regulation and Compliance</b> | Information to help ensure the health and safety (H&S and CDM) of the users of the facility, such as known issues and sub-optimal configurations.   | 4.5.1 iii, 4.6.2, 4.4.8         |

- Construction to Operation of Buildings – information exchange
- COBie, It's only Excel.
- Standard representation for life cycle management of facilities

## easy to use

- spreadsheet
- each party adds only their part
- interoperable with IFC

| 61          | 607.105  | 35          | Plumbing Fixtures,pumps, Backflow preventors, Vibration absorbers | L-1           | Lavatory             | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |
| 62          | 611.100  | 35          | Plumbing Fixtures,pumps, Backflow preventors, Vibration absorbers | L-1           | Lavatory             | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |
| 63          | 627.105  | 35          | Plumbing Fixtures,pumps, Backflow preventors, Vibration absorbers | WC-1          | Water Closet         | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |
| 64          | 635.104  | 100         | Diffusers, registers, and grilles                                 | SD-1          | Supply Diffuser      | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |
| 65          | 645.104  | 100         | Diffusers, registers, and grilles                                 | SD-1          | Supply Diffuser      | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |
| 66          | 655.104  | 100         | Diffusers, registers, and grilles                                 | R-1           | Return               | 3 Reynolds, Tim CB Engineers | 14-Apr-2008      | 14.16        |          | Component |

# COBie – Supplementary

## Supplementary sheets list:

- **Attributes and measures**
- **Impacts (cost and carbon)**
- **Connections**
- **Assembly**
- **Coordinates**
- **Project contacts**
- **Document references**
- **Issues and H&S**

Assembly

Assembly relationships between components and types

Contacts

Actors and their roles, including designers, consultants, contractors, sub-contractors and suppliers, warrantors and maintainers.

Documents

Documents including briefing, design and submittals

Attributes

Values with name, description, and unit.

Connections

Connections between components and types

Coordinates

Positioning of floors, spaces and components in 3d space.

Issues

Conflicts between objects, such as between the brief and the spaces.

Impact

Economic, environmental and social impacts by life cycle stage

# Management

How do we know we are getting it right ?

An

Solution

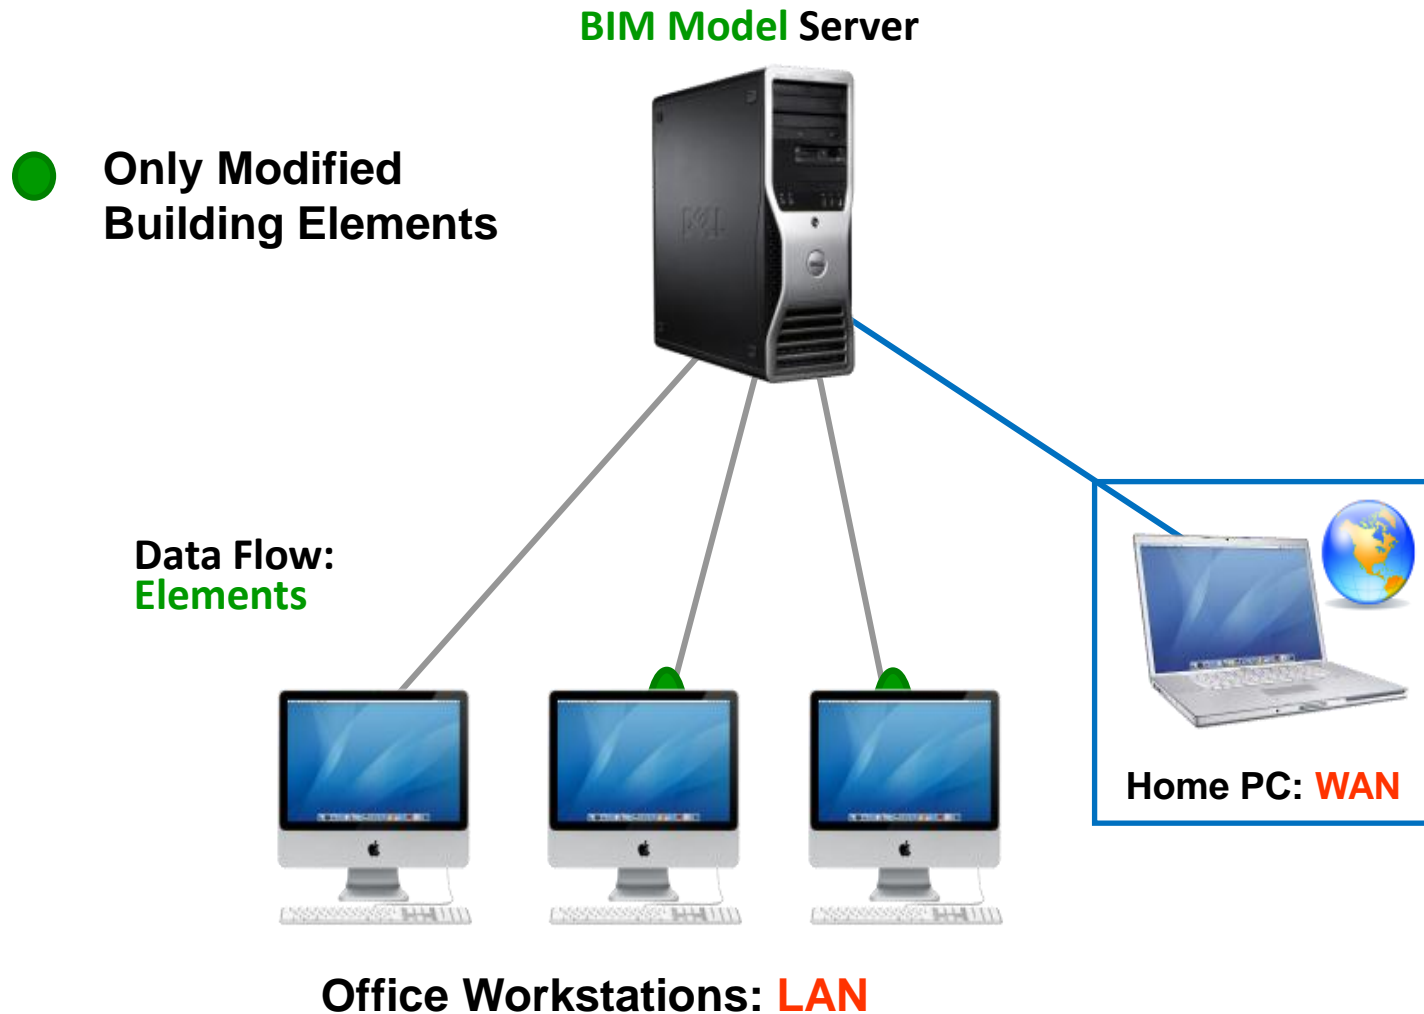

# Why ArchiCAD:

BIM Product of the Year 2011 & 2012

- Award winning renovation, refurbishment and retrofit facilities.

# Why ArchiCAD: Teamwork

- Smooth large team, multiple office capability using Delta-Server™ Technology.

# Why ArchiCAD:

**BIM**x

*The Ultimate BIM Communication Tool*

- > Navigate
- > Display BIM Data
  - Material Quantities
  - Measure Dimensions
  - Show Structures

- **BIMX Cloud integrated model-sharing service for tablet and smart phone.**

# Why ArchiCAD: Performance

Industry-first  
Background Processing  
for BIM

# Summary

- Open Standards
  - IFC & COBie
- ArchiCAD is an OPEN BIM Platform
  - 3D modelling and documentation for Architects
- ArchiCAD Pilot Scheme

Thank You
